

W.H.M.I.S. - Decanting

Sometimes products are received in a large container or jug, such as a cleaner. To make the product easier to handle and use, we “decant” the product into smaller containers. For example, we may pour out some of the cleaner from a gallon jug into a hand-held sprayer.

What type of product can you think of, that you may use, that comes in a supplier’s container and that you decant (or transfer) to a smaller container?

Product #1: _____
 Product #2: _____
 Product #3: _____

The smaller container needs a label so that the contents can be identified. Where would you find a label to use for this container?

What information would need to be on the label for each of these products?

Product #1: _____
 Product #2: _____
 Product #3: _____

What personal protective equipment (PPE) would you wear when using these products?

Product #1: _____
 Product #2: _____
 Product #3: _____

If there was a spill, what are the proper clean-up procedures for these products?

Product #1: _____
 Product #2: _____
 Product #3: _____
