

Environmental Services - Workplace Awareness

Report difficulties or unusual findings to your supervisor.

Pay attention to the task.

- Hazards are still present even though you may have been doing the work for years

Be aware of your surroundings and changing conditions at all times.

- Wet floors
- Swinging doors
- Poor lighting
- Uneven pavement
- Placement of furnishings

Remember to work safely to prevent injuries.

- Janitorial/housekeeping tasks are often repetitive
- As you become accustomed to the work routine, you may overlook the hazards
- A busy schedule, fatigue, or the past success of shortcuts may blind you to safety rules
